

Dear Mr. Bukkavar,

Let me take this opportunity to record my note of Appreciation for offering the TAALC_e software to Clariant, for supporting our regulatory compliance.

Introduction of the new TAALC_e software has been useful and helped us to move from conventional method to software based tracking system and also to maintain and monitor our compliance records. The inbuilt system to send alerts and features such as escalation matrix and quick review of compliance status are found to be very useful to our line Managers. In addition, we have found this tool to be useful to plan our Meetings, Audits and Inspections where tracking is required.

We do appreciate the efforts taken by Team Webstac for creating this software and wish you all the success.

Best regards,

P.A. Murali

Vice President - Regional Sustainability and Regulatory Affairs
